

# Fibaro

1.

In the provider selection window, choose **Fibaro** to proceed the project setup based on this home automation service provider.

See the [list of smarthome providers](#) in **detailed project setup**, to check which ones are supported

You will be redirected to **Fibaro login page**.

2.

After logging into your **Fibaro Account**, you will see the list of available **smarthome hubs**.

Select the appropriate one(s) and proceed.

The image displays two screenshots from the Fibaro setup interface. The left screenshot, titled 'FIBARO Nice elero', shows a login page with a text input for 'E-mail', a 'NEXT' button, and a 'Forgot password?' link. The right screenshot, titled 'NEW SPACE CREATOR Room creator', shows a selection screen for hubs. It includes a search bar with 'Fibaro' entered, a 'Select all' checkbox, and a list of hubs: 'HC3-Karocaria', 'HC3-TOMASZ C', 'HC2-BYDOM', 'HC3-Smarthouse', and 'VH-DEV'. Each hub has a checkbox and an information icon. Navigation buttons for 'Previous' and 'Next' are at the bottom.

3.

Here you can import the rooms. Pick at least a single room to be imported.

You are not required to import all of the rooms, although it is recommended - to keep the consistency between smarthome environments

Rooms can be added and edited afterwards as well

NEW SPACE CREATOR

### Room creator

Select the rooms you want to import from your hub(s).

Once your space is created, you will be able to add, remove and edit your rooms at any time.

Fibaro: HCS-Kancelaria

☐ Select All Rooms

☐ Default Room ☐ CORRIDOR ☐ TURQUOISE

☐ GREEN ☐ PINK ☐ ORANGE

☐ BLUE ☐ KITCHEN ☐ BATHROOM

☐ SECRETARIAT ☐ POWER ROOM

4.

The last step is to provide a **Matterport Virtual Tour** link. Either public or private link is accepted.

To use **private link**, you are required to **log in** to an appropriate **Matterport Account**

NEW SPACE CREATOR

### Visualization

Paste the link to your Matterport scan here.

Please note that if you want to use a private scan, you will need to log in to your Matterport Account.

Matterport link -

or log in to your Matterport account and select the space you want to use.

[Log in to Matterport](#)

## [Continue to project setup](#)

You can add a provider by selecting Providers in the side bar, and then clicking on [Add connections](#) button. The process will look exactly the same

You can also delete a connection by clicking on [Remove connections](#) button. Devices imported from the selected hub will be also deleted
