Providers

SIM-ON supports following providers:

- Nice Smart Home
- SmartThings
- Schneider KNX
- NETx
- IBM Maximo
- Homey

To connect to a chosen provider, open the Providers settings view from the Space Menu and press "Add connections." After choosing your provider, you will be redirected to the provider specific website, where you'll have to login to your provider account and be prompted to connect your HUB to the Space. Follow the instructions presented to you.
