Space Creation

A New Space is created from My Spaces view.

Adding Space

Clicking on the + Add Space button reveals the side menu:

Here we'll set the most basic Information of the space:

- Space Name *
- Thumbnail

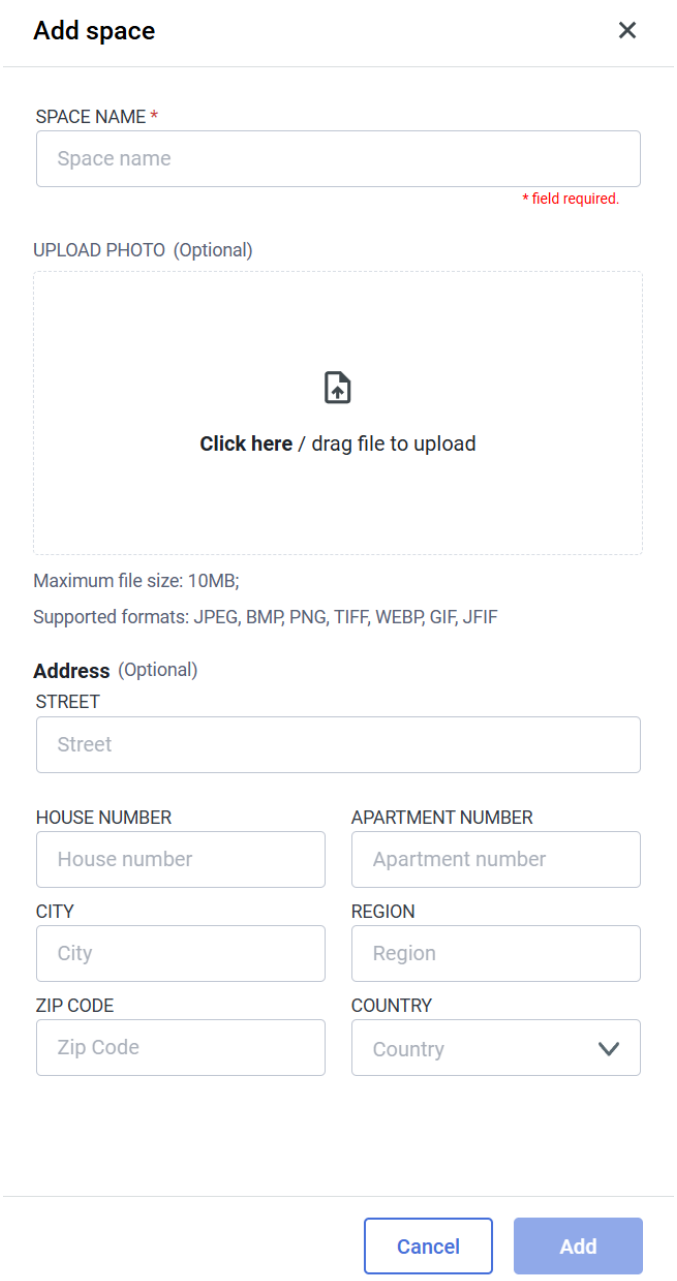

Address

- Street
- House Number
- Apartment Number
- City
- Region
- ZIP Code
- Country

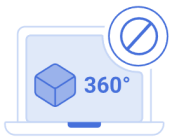

Only the **SPACE NAME** * is required to proceed with space creation

You can edit all of the information from here, at a later time, from **Space Settings**

With **SPACE NAME** set, you can press the Add button and finalize the Space creation process

The newly created Space is Empty. We'll go through adding some of the features in the following pages

Add Content

Space does not have any 3D virtual walk attached. Add your first by clicking below!
