

# Users

## Adding Users, changing Permissions and Privileges

If you want to add someone to your project, no matter what kind of collaborator it would be, you need to set some privileges. You can do it by clicking the **burger**  icon and then selecting Space settings in the Side bar. First, you can add roles. By default you, as the space creator, have the **OWNER** role. To create new roles, go to the Role templates tab and click  button. In the pop-up window enter new role name and click the confirm button.

### Add new role

Confirm

After accepting the new role, another window will appear, allowing you to change different privileges for the role you've just created.

You can set appropriate permissions in several categories: General privileges, Rooms, Devices, Assets, Scenes and Tickets. For the role created for this walkthrough, we will set all the privileges to View only.

Edit role Viewer 

General privileges	Rooms	Devices	Assets	Scenes	Tickets
Room	View	Edit	Create Assets	Create Devices	Access Revoked
Select all	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

You can create multiple roles with different privileges depending on who you share the project with. If you want to share it with subcontractors, you may want to give them roles to edit assets or devices. If you want, you may want to give separate roles to plumbers, electricians, people controlling the project, your closest associates, etc.

If you set some general privileges (eg. to create rooms), the privileges on the other categories will change too.

## Edit role Designer

General privileges	Rooms	Devices	Assets	Scenes	Tickets
Permission name					Allowed
Edit Space Info					<input type="checkbox"/>
View Providers					<input checked="" type="checkbox"/>
Edit Providers					<input type="checkbox"/>
Create Rooms, Users And Roles					<input type="checkbox"/>
Import Devices					<input type="checkbox"/>
Create Scenes					<input type="checkbox"/>
View Space Activity log					<input type="checkbox"/>
Create Tickets					<input checked="" type="checkbox"/>
Manage Interior Designer Editor					<input checked="" type="checkbox"/>

[Save](#)

In the example above, the Designer has some privileges to manage Interior Designer, Create tickets and view providers. Automatically some of the privileges were created (as you can see in the image below), but you can revoke the access to specific rooms, devices or other options (in this example the Designer role allows to manage the **Interior editor**, create tickets and view providers excluding **TURQUOISE, GREEN and PINK** rooms).

[Save](#)

To add a user, go to the Users tab and click [Add new user](#) button. You need to provide an email address and assign one of the created roles for the new user.

## Add user

Email Address \*

Assigned Role(s) \*

Add

After adding another user, you will see them on the list with the assigned role. You can edit the role later by clicking the **edit**  icon or delete the user by clicking the **bin**  icon.
