

Device list

The screenshot shows a web interface for managing devices. At the top, there are navigation tabs: 'Providers settings', 'Connections', 'Import device', and 'Device list' (which is active). Below the tabs is a search bar and two filter dropdowns for 'Provider' and 'Category', along with a 'Clear filters' button. The main content area displays a table with the following data:

Device name ↑	Provider	Category	Room	Status
25	Fibaro	[blurred]	test1	Disconnected
Device9_9999	NETx	[blurred]	test1	Disconnected
RGBW dimmer	KNX	[blurred]	test1	Disconnected

All the linked devices will be available here. From this tab you'll be able to check the status of the device, which HUB it belongs to, the Provider family and assigned room of the device.
